Chicago, Illinois 60604

Dear Mike:

From recent communications, it appears that our waste removal problem is nearly at an end. I have informed Terry Ayers, and John Steller of the \$17,200 approximated cost and that a waste contractor would be procured to actually load the waste, transport and incinerate at Ensco in Arkansas. You informed me in mid-April that the actual investigation which E.&E. has been contracted to perform is presently \$8,500 over budget. Please fill out one of the new Change Order forms which IEPA is now using and describe these level of effort changes that have been approved by our office.

You will additionally have to fill out another change order form once you develop a cost estimate for compilation of the final investigatory document and include the cost of participating in an informational presentation to; a) the industries in Sauget, b) the communities of Cahokia.

IEPA completed its review period on Thursday, April 28. Offices participating in the review were:

- IEPA's DLPC (FSMU, SRAPL, TECH. Compliance, Permits, Geohydro Section, FOS (Collinsville), PA/SI), APC, Community Relations, WPC, OCS,
- Attorney General's Office
- Illinois Department of Public Health
- USEPA

I anticipate a correlation of comments will be completed by May 6, 1988 and in your hands. We had a few major changes. Everyone was very complimentary of the deliverable generated by E. & E.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeff Larson', with a long horizontal line extending to the right.
